

## COMMENTS ON GLOBAL CARBON COUNCIL DOCUMENT

<b>Name of Stakeholder</b>	<b>Dr. Fedaa Ali</b>
<b>Organization</b>	<b>Qatar Foundation, Qatar Green Building Council</b>
<b>Address, Telephone, Email of Stakeholder</b>	<b>Qatar Foundation, Qatar Green Building Council, Villa 40.</b> <b>Tel: 44548385</b> <b>Email: <a href="mailto:fali@qf.org.qa">fali@qf.org.qa</a></b>
<b>Name of the document on which comment is provided</b>	GCCM001: "Methodology for Grid Connected Renewable Energy Generation Projects"

Sr. No.	Para No./ Figure No. / Table No.	Comment (Please provide background and rationale for comment)	Proposed change (Please provide details)
1	1.3	Clarify more emission – intensive mix of power source	Emission intensity (also carbon intensity) is the emission of GHG associated with a unit of power generation in this case.
2	2.4		<p>The determination of baseline scenario and baseline emissions are consistent with UNFCCC's Clean Development Mechanism (CDM) guideline "Guideline for determining baseline for measure/s" (Baseline Guideline) and referred to in the following documents applied:</p> <ul style="list-style-type: none"> <li>- 'GCC Program Manual' (paragraphs 43-46)</li> <li>- 'Standard on Key Project Requirements and Methodology Development'</li> </ul>

Sr. No.	Para No./ Figure No. / Table No.	Comment (Please provide background and rationale for comment)	Proposed change (Please provide details)
3	6.14	grid emission factor	<ul style="list-style-type: none"> <li>- Hypothetically, it means that a power plant with emission factor equivalent to grid mix would have supplied electricity in absence of new project plant or added capacity. A "grid emission factor" refers to a CO2 emission factor (tCO2/MWh) which will be associated with each unit of electricity provided. A grid emission factor is a reasonable benchmark that provides the proxy performance of the baseline power plant.</li> <li>- Provide records for standardized emission factor ref.</li> </ul>
5	7.19	The role of updating the list of positive renewable technology is by the country	The validity offered to the activity owner is 3 years
